# Jar&Cap Customizations

## Jar Decoration Options

### Glass Spray

color to the exterior of your glass bottles and jars

### Silk Screen Printing

Provides a thick, even lay down of ink. Best for simple 1-2 color designs.

### Heat Transfer Labels

Heat Transfers achieve detailed, multi-color decoration on jars and closures. Labels print more complex designs with a sharp appearance for regulations and product information.

### Hot Stamp

Leaves a bold, one color metallic or matte print on jars and closures.

### Acid Etch

Acid etching is a glass treatment that leaves the surface of the jar with a matte frosted finish. The process does not change the color of the jar.

### Embossing Logo

Customize with your logo built into our mold plates. Artwork is either raised or engraved into glass jars. only charge molds cost, no extra cost in production.

## Cap Decoration Options

### Hot Stamping

Metallic or matte foil leaves a bold print.

### Screen Printing

Provides a thick, even lay down of ink for 1-2 colors.

### 3D Printing

Achieve detailed, multi-color decoration on closures

### Debossed or Embossed Closure

Customize with your logo built into our mold plates. Artwork is either raised or engraved into the cap for an elevated 3D touch.

### Custom Color

Precise color matching to match your unique brand.

### Metalize

Design a metalized finish on closure, can be coated with a different color

### Water Transfer

Apply pre-printed designs to 3D surfaces.
